Not For General Public Release

TOPIC -----

Can I use AppleLink via X.400 to get to a user on SprintMail?

DISCUSSION -----

The AppleLink Help Line says there is no X.400 gateway for AppleLink. The only gateway available as of March 1991 is Internet.

Check with SprintMail to see if they have an Internet address gateway. If they do, you can send mail from AppleLink to their users via the Internet. This is similar to sending mail to CompuServe users to the Internet address xxxxx.xxx@CompuServe.com@Internet# from AppleLink.

Please contact the AppleLink Help Line at 408-974-3309 for questions regarding AppleLink.
