AppleLink: How to Copy the Link.Addresses File

Article Created: 18 April 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I tried copying the Link.Addresses file to another Macintosh II on the network, in order to use the same addresses on the other system. All I get is an empty address book.

DISCUSSION -----

You shouldn't have a problem doing that. Be sure to drag the file into the "AppleLink Out Basket" folder within the System Folder on the destination Macintosh.
