AccessPC v1.1: Requires AppleCD SC Driver v3.1

Article Created: 13 May 1991

Article Last Updated:

TOPIC -----

When AccessPC v1.1 is installed, I cannot mount a CD that has been formatted using the ISO 9660 File Access method. Before the CD driver can determine that a different file access method is required to mount the CD, AccessPC takes over and reports the volume as uninitialized.

I am using System 7.0 with the latest CD drivers (Apple CD-ROM extension v3.0).

DISCUSSION -----

We were able to duplicate the problem you describe. The solution is to use the latest version of the AppleCD SC drivers (version 3.1).
