TOPIC ---

How do I use an AppleCD SC Drive on an AppleShare Network?

DISCUSSION --

Here are the steps:

1) Install the AppleCD SC driver on the AppleShare Admin diskette
   and the file server volume.

2) Start up from the AppleShare Admin diskette and use the "Prepare
   volume for use with AppleShare" command.

The name of the CD-ROM will appear and AppleShare will create a parallel
directory structure for the CD. That's all it takes.
