AppleCD SC: How to Connect Loudspeakers

Article Created: 13 August 1991

TOPIC -----

I want to use Bose 101B speakers with the AppleCD SC so we can use the tech procedures off CD. Is all I need some speaker wire to hook these up? Are there speaker lugs on the back of the AppleCD SC player or will I need a cable for the headphone jack?

DISCUSSION -----

The AppleCD SC provides stereo line-out jacks on the back of the unit. The connectors are standard RCA phono plug jacks.

Because the output is non-amplified, an amplifier is needed to drive most loudspeakers. Self-powered speakers, such as the Bose Roommate series, need only be plugged in.
