## AppleCD 150: Description (Discontinued 1/94)

Article Created: 23 March 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

This article describes the AppleCD 150 drive.

DISCUSSION -----

AppleCD 150 is a cost-reduced revision of the existing AppleCD SC Plus drive. It uses a different enclosure instead of the traditional Apple plastic box. By making this change, we provide the same functionality and performance as the existing product, but at a much lower price.

### Features

-----

- 150KB per second
- Supports Macintosh HFS, ISO 9660/High Sierra file formats
- 380 ms average access time
- 64K cache memory
- Front-loading caddy door
- Automatic lens cleaning mechanism
- QuickTime ready
- SCSI interface

### Benefits

-----

- Fast data transfer
- Access to large number of titles
- Quick access to information
- Improved reliability
- Improved dust protection
- Can access video data
- Easy Macintosh connection, plug and play
