Article Last Updated:

TOPIC -----

What internal CD-ROM players are available for the internal bay of a Macintosh Quadra 900 or 950?

DISCUSSION -----

There are a number of third-party options, including MicroNet Technology, Peripheral Land, Inc., and MicroTech. You can obtain these CD-ROMs from computer retailers, or directly from the manufacturers.

Apple CD-ROM players fit, but we don't (nor does anyone else to our knowledge) provide the mounting hardware or audio and power cables.

On AppleLink, you can find contact information for the various vendors by clicking the Library Index button to view the folder structure in the Tech Info Library. An alphabetic listing of vendors is in the Third Party Company Directory folder.
