Macintosh LC 520: Using CD-ROM As Startup Volume (6/93)

Article Created: 28 June 1993

TOPIC -----

Can I start up my Macintosh LC 520 from a CD-ROM in the built-in AppleCD 300i?

DISCUSSION -----

Technically, yes you can. However, Macintosh system software is not designed to operate properly from a locked volume such as a CD-ROM.

Start up from a CD-ROM only when you're installing or upgrading system software.
