Microsoft Mail 3.1a: CD-ROM Software Conflict (3/94)

Article Created: 25 August 1993
Article Reviewed/Updated: 1 March 1994

TOPIC ---

Version 3.1a of the Microsoft Mail server conflicts with Apple CD-ROM
software. Is there a fix?

DISCUSSION --

Microsoft Mail Tech Support confirms there's a known problem with Microsoft
Mail server version 3.1a and CD-ROM activity when running on the same
Macintosh. If you're running an MS Mail server on a system with a CD-ROM
drive, any CD-ROM activity will cause the MS Mail server to hang.

Microsoft has corrected the problem in MS Mail Server 3.1c and later.
Please contact Microsoft directly regarding an upgrade for the MS Mail
server.

Article Change History:
1 March 1994 - Updated with current info, made Topic a complete
               sentence.
18 January 1994 - Updated to reflect release of Mail 3.1c.
