CD-ROM Setup 5.0: ISO 9660 Disc Directory Not Right (9/94)

Article Created: 19 September 1994

TOPIC -----

I have a ISO 9660 formatted CD and cannot get an accurate file count using the Get Info option. For example, if I have a 1000 files on the disk, Get Info reports that there are only 29 files on the disc. I need to get an accurate file count, so I need to know how?

DISCUSSION -----

There has been a documented problem with ISO 9660 extension versions 5.0 through 5.0.1. related to the disc directory and the ability to correctly read text files. In general, ISO 9660 CD-ROMs should work like any other Macintosh volume.

There is a new version of the ISO 9660 extension numbered 5.0.2. It comes with System 7.5. It will fix the problems that customers have been having with directories and problems involving unreadable text files.
