AppleCD 600e: Installing Software from Floppy Disk (6/96)

```
Article Created: 25 June 1996

TOPIC -----------------------------------------------------------

This article describes how to install the AppleCD 600e software on Macintosh
computers, which did not previously have the CD-ROM software installed on them.
Without the CD-ROM software installed, your Macintosh will not recognize the
Startup CD disc.

DISCUSSION ------------------------------------------------------

Many of the newer Macintosh computers have built-in support for CD-ROM drives.
These Macintosh computers have the basic CD-ROM drivers in ROM. If your computer
does not have the CD-ROM drivers in ROM, you will not be able to startup your
Macintosh computer with the Startup CD included with the AppleCD 600e CD-ROM
drive. In order to get the CD-ROM drivers installed, you must copy the Apple
CD-ROM extension to a floppy disk. You will have to use a Macintosh computer
with a CD-ROM drive to copy the Apple CD-ROM extension from the CD-ROM included
with the AppleCD 600e drive.

Copying Minimum CD-ROM Files
============================

Step 1
------
Open the CD-ROM Software folder on the CD-ROM Setup disk.

Step 2
------
Drag the Apple CD-ROM file to a floppy disk.

Step 3
------
Choose Restart from the Special menu.

Let your Macintosh start up from the normal startup drive.

Step 4
------
Insert the floppy disk with the Apple CD-ROM file on it into your Macintosh
computer.
```

Step 5

Drag the Apple CD-ROM file onto the closed System Folder on the hard drive.

A dialog appears explaining that extensions need to be stored in the Extensions
folder.

Step 6

Click OK

This places the Apple CD-ROM file in the Extensions folder.

Step 7

Choose Restart from the Special menu.

Allow the Macintosh to start up from the hard disk.

Step 8

Insert the CD-ROM Setup CD in the CD-ROM drive.

The CD-ROM disc will appear on your desktop.

Step 9

Double-click Installer on the CD-ROM Setup volume to finish installing all files
from the CD-ROM Setup volume.

When the Installer is done, an Installation Complete dialog with a Restart
button appears.

Step 10

Click Restart.

After restarting, your Macintosh is able to use the AppleCD 600e drive.
