Apple 16-Inch Color Display: Compatibility

Article Created: 15 January 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

The Apple 16-inch Color Display works with Quadra 700 and 900 internal video. Other Macintosh II systems require a display card.

DISCUSSION -----

Quadra Built-in Video

The Quadra 700 and 900 built-in video provides 256 colors in the base configuration, and 16.7 million colors with expanded VRAM.

Display Cards

The Apple 16-inch Color Display works with the Macintosh Display Cards 8•24 and 8•24 GC, version B or later. (If you have one of these cards and it's earlier than version B, you can have the ROMs upgraded.)

The number of colors provided by the Macintosh Display Cards are as follows:

Macintosh Display Card 8•24	256 colors
Macintosh Display Card 8•24 GC	32,000 colors
