## AudioVision 14 Display: Using the Turbo Mouse (7/93)

Article Created: 29 July 1993

TOPIC -----------------------------------------------------------

This article discusses using the Turbo Mouse with the AudioVision 14
Display

DISCUSSION ------------------------------------------------------

If you use the AudioVision 14 Display with the Turbo Mouse, the mouse will
not work if it is plugged into the ADB port on the monitor.  You MUST plug
the Turbo Mouse into the back of the computer.  If your computer has only
one ADB port, you'll need to buy a Y-adapter cable to accommodate both the
mouse and the ADB plug on the AudioVision adapter cable.
