## AudioVision 14 Display: System 7.5 Compatibility (7/96)

Article Created: 27 June 1995

Article Reviewed/Updated: 19 July 1996

TOPIC -----

Are there any known issues with the AudioVision Display Software 1.0.2 and System 7.5?

DISCUSSION -----

The AudioVision Display Software was not fully tested using System 7.5, so there were some software related issues. Instead of using the AudioVision Display software, you should upgrade to the AppleVision software v1.0.2 or later which addresses all of the AudioVision issues. The AppleVision software is available on Apple Software Update sites.
