AppleColor RGB Monitor: How To Connect It To The Apple IIc

This article last reviewed: 29 September 1988

While limited to only 8 colors, the AppleColor RGB Monitor does work with the
Apple IIc with:

  1) a Telemax Inc. "Peacock" RGB interface for the complete connection (like
     the connection for the Apple Color 100 Monitor)
and

  2) a new interface cable, the pinouts of which are:

```
     DB15 Pin        DB15 Pin

         1 <----------> 6
         2 <----------> 5
         3 <----------> 3
         5 <----------> 2
         6 <----------> 1
         9 <----------> 9
        10 <----------> 10
        13 <----------> 13
     Shell <----------> Shell
```
