Videotaping Apple RGB Monitor in PAL

This article last reviewed: 22 January 1991

TOPIC ---

Is it possible to videotape the Apple RGB monitor using a professional PAL
video camera and VideoSync?

DISCUSSION --

Here's one solution:

1) Use VideoSync, and set it to stable scan rate.

2) Tape with a Sony BVP-7 professional Betacam SP PAL video camera.

3) Set the camera's built-in shutter to 1/100.

The picture should be quite stable. The only drawback is a very slight loss
of exposure due to the shorter exposure time using the shutter.
