TOPIC -----

This article describes the AppleColor RGB Monitor.

DISCUSSION -----

The AppleColor RGB Monitor simultaneously displays high-resolution text color graphics for the Apple IIGS.

Features

- A 12-inch screen.
- High-resolution analog RGB color.
- Direct connection to the RGB port of the Apple IIGS; the connector cable is supplied and no adaptor or interface card is necessary.
- Display of all 4,096 colors generated by the Apple IIGS; 256 colors can be displayed at one time.
- Crisp 80-column text as well as graphics, eliminating the need for separate monitors for your applications.
- Platinum finish that matches the Apple IIGS.

Benefits

- Presentation of a full range of colors in a sharp, true image.
- Presentation of color text and graphics clearly at the same time.
- Easy installation; no interface card is required.
- A complete color solution for Apple IIGS.

Order Number

- AppleColor RGB Monitor
