AppleVision 1710AV: Proper Setup for Microphone (12/95)

Article Created: 05 December 1995

TOPIC ---

How can I properly set up the microphone on my AppleVision 1710AV Display?

DISCUSSION ---

To verify that the AppleVision 1710AV Display is properly set up, follow these
steps:

Step 1

Make sure that the audio cables are plugged into the correct places on the
computer. An easy way to check this is to verify that the icon on the cable
matches the icon on the computer's port.

Step 2

Use Macintosh Guide to properly set up the software. The setup varies depending
on which computer the display is connected to.

Step 3

Set the microphone to the highest quality sample rate (44 kHz) and bit depth
(16-bit).
