Display Enabler 2.0.2: Now Utilities 6.0 has Conflict (9/96)

Article Created: 20 September 1996
Article Reviewed/Updated: 25 September 1996

TOPIC ---

I just installed Now Utilities 6.0. When I restarted, I got an error message
from Now Startup Manager stating that the Display Enabler crashed my system. Why
is this happening?

DISCUSSION ---

The Now Utilities 6.x Toolbox extension is not compatible with Display Enabler
2.0.2. The table below gives you a list of options available depending on what
display and version of the Mac OS you have.

Begin_Table

Monitor	Mac OS Version	Display Enabler	Fix
AppleVision 1710AV Display & AppleVision 1710 Display	7.5, 7.5.1, 7.5.2, 7.5.3, 7.5.5	2.0.2*	Use Display Enabler 2.0.2 until the next AppleVision Display software is released, and use the Extensions Manager, not Now Startup Manager.
Other Multiple Scan Display	7.5, 7.5.1, 7.5.2	2.0.2	Upgrade to System 7.3 or later, OR upgrade to Display Enabler version 2.0.3
Other Multiple Scan Display	7.5.3, 7.5.5	NONE	None. There are no known conflicts with built-in Display Enabler.

End_Table

* You must use Display Enabler 2.0.2 with the AppleVision Displays. Display Enabler 2.0.3 is not compatible with the AppleVision software.
