Display Card 8•24GC Works with the 12-Inch RGB Monitor

Article Created: 10 January 1991

Article Reviewed/Updated: 1 May 1995

TOPIC -----

Does the 8•24GC card support the 12-inch RGB monitor?

DISCUSSION -----

The 12-inch RGB monitor and the 8•24GC card work very well together.

For several weeks now, we have used the Macintosh 12-inch RGB Display with both the 8•24 and the 8•24GC cards. We have had no difficulty in using either card with this monitor. I have tried different 12-inch RGB Displays, all with complete success.
