Article Last Updated:

TOPIC -----

This article lists the ergonomic features of the Macintosh 21-inch Color Display.

DISCUSSION -----

Important ergonomic features include:

- The antiglare, antistatic panel reduces glare and dust build-up.
- The built-in tilt and swivel base allows you to change the viewing angle.
- A 75 hertz screen refresh rate eliminates screen flickering.
- The ADB ports are easy to access on the front of the base.
- The brightness and contrast controls are also easily accessed on the front of the monitor.
- The following features minimize the desk space needed for the monitor:
 - Curved and recessed base
 - Recessed video cable connector
 - Right-angled power cord
- The hard plastic spheres on the bottom of the base make it easier to lift and slide the monitor.
