## AppleColor RGB Monitor (IIGS): Not Compatible with Mac Systems

Article Created: 29 April 1992

Article Last Reviewed: 3 June 1992

Article Last Updated:

TOPIC -----

Can I use my AppleColor RGB Monitor (for the Apple IIGS) with a Macintosh?

DISCUSSION -----

No. The AppleColor RGB Monitor (IIGS) is not compatible with Macintosh computers.

The vertical and horizontal sync rates supported on Macintosh video cards and by the built-in video provided with certain models, like the Macintosh LC/LC II and Macintosh IIsi, are not compatible with those of the AppleColor RGB Monitor (IIGS).
