Multiple Scan 15 Display: No Sound From Speakers (7/95)

Article Created: 05 July 1995

TOPIC -----

I have a Multiple Scan 15 Display, and I do not get any sound out of the built-in speakers.

DISCUSSION -----

In order to have sound output from the speakers on the Multiple Scan 15 Display, the sound output cable, which is included with the display, must be connected. To properly connect the cable, follow these steps:

1. Attach one end of the included sound output cable to the sound output port on the back of the computer.
2. Attach the other end of the sound output cable to the sound output port on the back of the monitor.
