## Macintosh: When Removing Second Monitor, Remove Video Card Too

Article Created: 16 August 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I had two monitors connected to my Macintosh. After removing one monitor, I was unable to see the icons that were displayed on the monitor I removed.

DISCUSSION -----

If you did not also remove the video card for the monitor you removed, the Macintosh thinks that the monitor is still there. Remove the extra video card to correct this problem.
