Video Monitors: Why Some Screens Have Squared Corners

Article Created: 15 January 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I'm using a Macintosh SE/30 to which I added an AppleColor High-Resolution RGB Monitor. I noticed something unusual about the monitor's display area: all corners, except the lower left, are rounded. The lower left has a squared (right-angle) corner. Is this a defect?

DISCUSSION -----

This is not a defect nor is it peculiar to the AppleColor High-Resolution RGB Monitor -- we have seen these squared corners on other Apple and third-party monitors. It's just cosmetic and is more likely to happen when multiple monitors are connected to the computer.
