Apple Displays: Type of Phosphor Used (2/96)

Article Created: 14 February 1996

TOPIC -----

What type of phosphor is used in the Multiple Scan 17 Display?

DISCUSSION -----

The type of phosphor that is used in most of Apple's displays is Aluminized P22 Medium-short persistence. This is for both Trinitron and "standard" CRT type displays.

Examples of:

Trinitron Displays - Multiple Scan 17 Display, Multiple Scan 20 Display, AppleVision 1710 Display, AppleVision 1710AV Display.

"Standard CRT" Displays - Multiple Scan 15 Display, Multiple Scan 14 Display, Multiple Scan 1705 Display.
