## Adjustable Keyboard: Command Key Shortcuts & VersaTerm (2/95)

Article Created: 25 August 1993

Article Reviewed/Updated: 02 February 1995

TOPIC -----

When I use my Adjustable keyboard with VersaTerm Pro, the Command-key shortcuts are not recognized. Is there something included with System 7.1 that fixes the problem?

DISCUSSION -----

Apple Support used VersaTerm-Pro 3.6.3, with the Adjustable Keyboard and did not have any problems with any command key shortcuts. Specifically, we used the following command key shortcuts:

CMD-S calls up Send files  
CMD-Y calls up Text Options  
CMD-I goes off/on line  
CMD-K clears page  
CMD-J jumps back

To answer your question, there is nothing in System 7.1 to fix the Adjustable keyboard. You may want to check your version of VersaTerm Pro.
