TOPIC --

Are the key codes for the Apple Extended Keyboard different from those of
the Apple Standard Keyboard?

DISCUSSION ---

The key codes for the Apple Extended Keyboard differ slightly from those
of the Apple Standard Keyboard. The following list includes only those
keys whose codes are different from the Apple Standard Keyboard:

```
F1              7A
F2              7B
F3              63
F4              76
F5              60
F6              61
F7              62
F8              64
F9              65
F10             6D
F11             67
F12             6F
F13             69
F14             6B
F15             71
HELP            72
HOME            73
PAGE UP         74
PAGE DOWN       79
DELETE          75
END             77
CURSOR UP       7E
CURSOR DOWN     7D
CURSOR RIGHT    7B
CURSOR LEFT     7C
```

Application software should NOT be designed so that it depends on these
key codes -- because they will probably change. These codes are used by
the application and are not necessarily what the keyboard actually puts
out. Any unused codes not listed here are not yet defined and should not
be used.

Key codes for the Apple Standard Keyboard are found in the "Macintosh
Family Hardware Reference."
