Apple SuperDrive: Requires System 6.0.3 or Later (10/94)

Article Created: 17 February 1991
Article Reviewed/Updated: 27 October 1994

TOPIC ---

I am using DOS mounter and an Apple SuperDrive (formerly Apple FDHD) attached to
a Macintosh SE. When I insert a 720K or 1.44MB DOS disk, the disk doesn't
mount. Using Apple File Exchange doesn't help.

Is there a specific Apple System version necessary to operate the SuperDrive?

DISCUSSION --

For the best use of the SuperDrive, we recommend System software 6.0.3 or
later.
