AppleFax Modem: When Wrong Size Letter Is Sent

```
This article last reviewed: 19 February 1991

TOPIC -------------------------------------------------------------

I have an AppleFax modem that always sends European letter-size faxes
instead of regular letter-size.

I have re-done the setup three times, step-by-step, with no luck. Could
this be a ROM problem?

DISCUSSION --------------------------------------------------------

It is possible that there is a ROM problem with your AppleFax Modem. There
was a ROM upgrade for the AppleFax and you should order it.

If that still does not cure the problem and all your settings have been
checked and verified, the logic board probably is the cause of the problem.
