GeoPort: Virtual Memory Compatible With Megaphone Program? 6/95

Article Created: 14 June 1995

TOPIC ---

Will Megaphone Voice Messaging software work with virtual memory turned on?

DISCUSSION --

Cypress Research's Megaphone software will work with Virtual Memory turned on,
but if you are experiencing choppy or intermittent sound then try turning off
virtual memory.

The extra hard drive access traffic that results from Virtual Memory operations
can throw off the critical timing requirements of telephony applications.
