GeoPort/Express Modem Update 3.0 & Apple Telecom 3.0 (12/96)

```
Article Created: 2 December 1996

TOPIC -----------------------------------------------------------

Is the Apple Telecom 3.0 software included in the GeoPort and Express Modem
Update 3.0 software found on Apple Computer's software update locations?

DISCUSSION ------------------------------------------------------

The GeoPort and Express Modem Update 3.0 upgrades the lower level components of
Apple Telecom software to 3.0.3. It does not provide the Apple Telecom 3.0
applications, in other words the Apple Telecom 2.x applications are not
upgraded.

As of November, 1996 the only users that should have Apple Telecom 3.0
applications are Macintosh or Performa computers that contain a bundled GeoPort
internal modem.
