AppleFax Cover Page and the To: Field (12/96)

```
Article Created: 18 December 1996

TOPIC -----------------------------------------------------------

When faxing with a Cover Page with AppleFax, some information in the "To:" field
is truncated, omitted, or out of logical order.

- The last name is omitted
- There is no line break after the Address Field
- The Zip Code appears before the city
- The State doesn't appear at all

What is wrong?

DISCUSSION -------------------------------------------------------

You have found a bug in the AppleFax software, some but not necessarily all of
the issues listed may occur. It has been reported to engineering, however, there
is no known date when this might be fixed.
