Prometheus ProModem 1200M: Using it with all Apples

Modem type:
  AT&T 103/212A series; 1200 or 0-300 bps.

Instruction set used:
  Fully HAYES compatible with ProCom-M Macintosh software package.

Hardware configuration:
  Twelve LED characters and eight LED indicators on front panel give call,
  modem, and data status. Internal back-up battery provides back-up power
  for clock / calender, modem configuration, and auto-dial number storage in
  memory. Modem runs off of 117VAC, 60 Hz. Same as Prometheus ProModem 1200
  except for added cable and software.

Software configuration:
  Microprocessor controlled intelligent modem with clock / calender set, help
  menu, number storage, auto-dial, and auto-answer functions.

Interface type:
  RS-232 DB-25S (DCE) connector, full or half duplex operation. Special
  cable provided for Macintosh interface.

Modem interface packages, by computer:

  Apple IIe (Super Serial card):
    Designed for Macintosh. See Prometheus ProModem 1200.

  Apple IIc:
    Designed for Macintosh. See Prometheus ProModem 1200.

  Apple III:
    Designed for Macintosh. See Prometheus ProModem 1200.

  Macintosh:
    ProCom-M terminal software; Macintosh to ProModem 1200M cable provided for
    hardware connection.

  Macintosh XL:
    ProCom-M terminal software; Macintosh to ProModem 1200M cable provided for
    hardware connection. DB-9 to DB-25 cable adapter needed for connection.
