HayesConnect 1.0C: Corrects Hang Problems of 1.0B

This article last reviewed: 9 August 1989

TOPIC --

I have a problem running the Hayes Modem serving software on our AppleShare
File Server. Here is the configuration:

```
Server:   Macintosh IIcx with 4MB RAM
Software: AppleShare 2.0.1
          Timbuktu 2.0.1 f2
          HayesConnect 1.0B
```

The system hangs in AppleLink and in MacTerminal communications. The
server also hangs and has to be reset. Why?

DISCUSSION ------------------------------------

The problem is probably with HayesConnect, version 1.0B. Contact Hayes
Technical Support group for an update to HayesConnect 1.0C, which should
correct this problem.
