TelePort Gold IIv Modem: Call Arbitration (9/95)

Article Created: 30 August 1995

Article Reviewed/Updated: 7 September 1995

TOPIC -----

Is the Global Village TelePort Gold IIv internal modem, bundled with the Performa 5200 and 6200 family of computers capable of determining whether an incoming call is a fax or voice call?

DISCUSSION -----

The internal modem bundled with these computers automatically handles arbitration between the GlobalFax and MegaPhone software. To setup the software, so the modem will arbitrate your calls, open the Telephone Setup control panel and select the "Auto-answer incoming calls after 4 rings" option. This selection will direct the incoming call to the appropriate software, whether the call is either voice, or fax.

Use the search string 'megaphone and record' to locate the TIL article "MegaPhone: How to Record Outgoing Message" for additional information on setting up your computer as an answering machine.
