Cellular Modems: Availability

Article Created: 4 October 1989

Article Change History

02/12/93 - UPDATED

- Vendor information.

TOPIC-----

Do you know anyone who makes car phone modems?

DISCUSSION-----

You have two options:

- 1) An internal cellular modem. This is more expensive. However, Fujitsu makes a mobile phone with a datalink option.
- 2) Use a data jack with any existing Hayes-compatible modems. The data jack serves as an gateway and does not interfere with the phone or the modem. It is independent to the modem baud rate. Data jacks costs about \$150 and are available from Cellab in Canoga Park, CA.

You might want to try the phone book in your area for distributors of these products. If you cannot find any information in your area, try the following distributors in Northern California: CelluTel of Palo Alto and Mobile Land in Fremont.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
