Apple OneScanner: Ofoto and HyperScan Software

Article Created: 9 October 1991
Article Last Reviewed: 15 May 1992
Article Last Updated:

TOPIC -----

Why does the OneScanner include two scanning applications, Ofoto and HyperScan?

DISCUSSION -----

Ofoto is the main scanning application. Ofoto provides the key benefits of one-button scanning and high-quality images. This is the application that most people will use most of the time.

HyperScan is specifically for users who create HyperCard stacks. HyperScan 2.0 is a HyperCard stack that scans images for use in other HyperCard stacks. It provides 1-bit (black and white) images for on-screen use. Copyright 1991, Apple Computer, Inc.
