Apple Scanner: Fixing Save As Untitled Settings 2 Problem (9/95)

Article Created: 16 September 1988
Article Reviewed/Updated: 20 September 1995

TOPIC --

Whenever I scan and save a new image and then I try to save the resulting new
settings I get a System Error ID 12. What is wrong?

DISCUSSION ---

In the AppleScanner software, the brightness and contrast settings can be saved.
Each setting that is saved has to be named; the default name is "Untitled
Settings".

If the settings are saved as "Untitled Settings", the next default name is
"Untitled Settings 2". The problem occurs when saving these new settings as
"Untitled Settings 2": when an image is scanned and saved, a System Error ID 12
occurs.

The reason for the error is that maximum length for a setting name is 16
characters, and "Untitled Settings 2" violates this rule.

To work around this problem, each time a new setting is saved, use the "Save
as..." option, and give the file a name of 16 or fewer characters.
