Color OneScanner 600/27: Blank Scans With Document Feeder (3/96)

Article Created: 6 March 1996

Article Reviewed/Updated: 12 March 1996

TOPIC -----

Sometimes when using the Automatic Document Feeder (ADF) on my Apple Color OneScanner 600/27 it scans a blank page or a strange vertical pattern. Why?

DISCUSSION -----

Usually there is something left on the scanner glass. Check the scanner glass for any paper. Before using the Automatic Document Feeder you should always check the scanner glass and make sure it is clear of any previous documents or paper.
