OmniPage Pro: Use Version 2.1 with HP IIP Scanner and System 7

Article Created: 31 July 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I'm using a Macintosh IIci running System 7 (Tune-Up installed) with an HP IIP Scanner and OmniPage Pro 2.0 by Caere Corp.

The scanner works fine with HP software. However, when I try to use OmniPage Pro, I can see the scan taking place on the screen, but there's no physical action from the scanner. All I get is a blank scanned image.

DISCUSSION -----

According to HP and Caere Corp., you need to use OmniPage Pro 2.1 with System 7 and the HP IIP Scanner. Contact Caere Corp. for upgrade information.

To locate a vendor's address and phone numbers, search with this syntax:

Vendor AND 3rd

where "Vendor" is the vendor's name.
