Micro Touch Screen: Not Compatible with CloseView (11/95)

Article Created: 6 December 1989

Article Reviewed/Updated: 29 November 1995

TOPIC -----

I have a Macintosh SE with 1MB RAM and Micro Touch Screen installed. System software is System 6.0.2 and Finder 6.1. My problem is that Macintosh SE freezes on "Welcome to Macintosh" window.

DISCUSSION -----

Unfortunately, Micro Touch software is not compatible with the Control Panel document "CloseView". Your fix is to remove CloseView from the System Folder.
