Apple 410 Plotter: Compatible Plotter Drivers

This article last reviewed: 7 March 1990

TOPIC -----

I have an Apple 410 plotter. I have the pinouts for connecting it to an IBM PC. Because most of my applications won't have drivers for my plotter (Harvard Business Graphics, in particular), what other drivers can you suggest?

What other plotters is the Apple plotter compatible with?

DISCUSSION -----

The Apple Plotter is based on the Yokogawa Electric Works (YEW) PL-1000. You should be able to use any plotter driver for the PL-1000 with the Apple Color Plotter.
