Color StyleWriter Pro: Watermark, N-up, Desktop Printing (7/95)

Article Created: 17 July 1995

TOPIC ---

We have several Color StyleWriter Pro printers. We would like to use some of the
new features that are included with the new print drivers for the StyleWriter
1200, 2200 and 2400. My questions are:

1. Will any of these drivers work on a Color StyleWriter Pro and allow the use
of Desktop Printing, WaterMarking and N-up printing? If so, which driver?

2. Is this a supported solution?

DISCUSSION --

None of the new drivers will work with the Color StyleWriter Pro. Watermark and
N-up features are built in to these specific drivers so those functions are not
available for the Color StyleWriter Pro.

However, you can use your original Color StyleWriter Pro print driver and still
get desktop printing capability. The desktop printing software is backward
compatible with and supported on any Apple print driver that uses PrintMonitor.

The desktop printing software is not currently available separately. However, it
is included with the LaserWriter 8.3 software. The software is also included in
the original disk sets of the StyleWriter 1200, 2200, and 2400 printers.

NOTE:
Desktop printing REQUIRES Finder version 7.1.3 or greater to operate, thus
requiring Systems 7.1.1 or greater.

These articles can help you locate the software update mentioned here:

• "Where To Find Apple Software Updates" - Lists online services for free Apple
software updates.

• "Obtaining Apple Product Support in the USA" - Lists 800 numbers and online
services for software updates, Apple support information, and a subset of the
Apple Tech Info Library.
