TOPIC ---

Is there any way to connect a Macintosh to an HP 2P LaserPrinter? I have
unsuccessfully tried using the Orange Micro Grappler LX. The Grappler LX
does work, however, with the HP LaserJet Plus.

DISCUSSION --

We contacted Orange Micro and found that the HP 2P and Macintosh computers
using a 68020, 68030, or 68040 can connect with a Grappler LX. Macintoshes
using a 68000 must use the Orange Micro Grappler LS.

Orange Micro also states that the HP printer must have a minimum of 1MB of
RAM to function properly with their equipment.
