Color StyleWriter 1500: No Printer Tray Available (4/96)

Article Created: 9 April 1996

TOPIC -----

The Apple Color StyleWriter 1500 User's Guide indicates there is some type of paper receiving tray, but I do not see one.

DISCUSSION -----

The manual is incorrect. Although an output tray is mentioned in a couple of different places, there is no output paper tray on the Color StyleWriter 1500 printer. The front panel of the printer extends past down the base plate and precludes installing an output paper tray.
