## Color StyleWriter 2400: Color Banding at Bottom of Page (9/94)

Article Created: 16 September 1994

TOPIC -----

At the bottom of the page I get white horizontal lines, colors out of phase and color banding. How can this be avoided?

DISCUSSION -----

This can occur on the bottom 0.8 inch of the page, due to the friction rollers not being in contact with the paper. Only fix is to increase margin at bottom of the page, as noted on Page 57 of the User's Manual.
