Color Stylewriter 2400 & ClarisWorks: FPU Not Installed (5/95)

Article Created: 23 January 1995
Article Reviewed/Updated: 4 May 1995

TOPIC ---

I get an error message that says, "Floating Point Coprocessor Not Installed"
when I launch the database function of ClarisWorks.

I have a Performa 636CD, System 7.5, and ClarisWorks 2.x. The Color StyleWriter
2400 driver is selected in the Chooser.

DISCUSSION --

We were able to duplicate your problem with Clarisworks 2.x. When we installed
ClarisWorks 3.0 the problem was resolved. To solve this problem, you have two
options available:

1) You can contact Claris for a maintenance upgrade of 2.1 (2.1.4 is the version
you need).

2) You can contact Claris for a upgrade to version 3.0 of ClarisWorks.
