Color StyleWriter 2400: Installing LocalTalk Option (7/95)

Article Created: 18 July 1995
Article Reviewed/Updated: 28 July 1995

TOPIC ---

This article describes the Color StyleWriter 2400 LocalTalk Option (M3458LL/A).

DISCUSSION --

The Color StyleWriter 2400 LocalTalk Module allows Color StyleWriter 2400 users
to connect their printers directly to LocalTalk networks, thereby eliminating
the need for a dedicated host, as is necessary with ColorShare. The LocalTalk
Module is user installable; it plugs directly into the printer's serial port.

This prodecure covers the installation of the optional LocalTalk module, which
enables the printer to connect to a LocalTalk network.

• Using a small flat-blade screwdriver, release the mounting tab and remove the
interface cover from the rear case.

• Plug the LocalTalk connector into the serial port on the printer.

• Insert the upper edge of the LocalTalk module into the rear case of the
printer, and then snap the bottom into place.

Part numbers mentioned in this article are accurate as of this writing. Before
ordering, verify that they are still correct as they are subject to change.
