Color StyleWriter LocalTalk Modules: Question & Answers (6/96)

Article Created: 12 April 1996
Article Reviewed/Updated: 25 June 1996

TOPIC ---

This article contains information on the Color StyleWriter LocalTalk options
available for the Color StyleWriter 2400 and Color StyleWriter 2500 printers.

DISCUSSION --

There are two LocalTalk modules available:

```
+========================+=============+===============================+
| Printer                | Apple Part #|          Description          |
+========================+=============+===============================+
|                        | M4615ZM/A   | LocalTalk Module for both CSTW |
| Color StyleWriter 2400 |             | 2400 & 2500.                  |
|                        +-------------+-------------------------------+
|                        | M3458G/A    | LocalTalk Module ONLY for CSTW |
|                        |             | 2400.                         |
+------------------------+-------------+-------------------------------+
| Color StyleWriter 2500 | M4615ZM/A   | LocalTalk Module for both CSTW |
|                        |             | 2400 & 2500.                  |
+------------------------+-------------+-------------------------------+
```

Questions & Answers
===================

Question: What do the LocalTalk Modules look like? Are they cards? Are they
identical?

Answer: The Color StyleWriter LocalTalk Options are external modules. They
connect to the back of the printer and plug into the serial port. The LocalTalk
Options are not cards. They look identical except for the writing on the module
itself. The Color StyleWriter 2400 LocalTalk Module (M3458G/A) does not have any
writing on it, the Color StyleWriter 2400/2500 LocalTalk Module (M4615ZM/A) says
LocalTalk module for the Color StyleWriter 2400 and 2500.

Question: Which printers do the Color StyleWriter LocalTalk modules work with?

Answer: The Color StyleWriter LocalTalk Module M3458G/A only works with the

Color StyleWriter 2400. The Color StyleWriter LocalTalk Module M4615ZM/A works
with both the Color StyleWriter 2400 and Color StyleWriter 2500.

Question: What printer drivers do I need? Is there a Color StyleWriter 2400
AppleTalk/Color StyleWriter 2500 AppleTalk driver?

Answer: You use the printer driver that ships with the printer. The driver
supports both serial and LocalTalk connections. There is not an AppleTalk
StyleWriter driver for either printer. However, the Color StyleWriter 2500
driver is backward compatible and can be used with either printer.
